Research on **Multicasting Networking** and the research publication includes:

1. Hybrid Byzantine Agreement on a Multicasting Network, Proceedings of the 6th World Multi-Conference on Systemics, Cybernetics and Informatics, Vol. V, pp. 259-264, 2002.

2. Achieving High Efficient Consensus in a hybrid fallible Multicasting Network, Proceedings of the Fifteenth International Conference on Systems Engineering (ICSEng 2002), 2002.

3. Consensus with Dual Link Failure Modes on a Multicasting Network, Proceedings of E-Era Challenge International Academic Conference, pp.289-299, March 22, 2002.

4. More Efficient and Reliable Byzantine Agreement with Dual Failure Mode on a Multicasting Network, Proceedings of 2002 Symposium on Digital Life and Internet Technologies, 2002.
